Throughout aviation history there have been many aircraft designs that have failed to progress beyond the drawing board for a variety of reasons. The aircraft that have taken to the skies represent only a small percentage of those that were planned.

This latest title in the highly successful Secret Projects series is also the first to deal with United States aircraft. Compiled by Tony Buttler, who has been researching the subject for many years, this book examines the great variety of U.S. fighter designs between the end of World War II and the period immediately after the USA's withdrawal from Vietnam.

The book covers the immediate postwar designs of subsonic aircraft for both the USAF and USN, U.S. supersonic designs, the U.S. Vertical Take Off and Landing program, and the competitions that ultimately led to the development of iconic aircraft such as the F-14 Tomcat.

A look at what might have been

By truckerman

most of these are not really secret projects, just designs that never made it past the mockup stage, but an interesting look at how some of the late 20th century's most famous fighters might have looked if things had gone differently. What if the Navy had ordered a swing-wing variant of the F-4 phantom?, what If Grumman had went with the fixed wing design for their G-303 (F-14 Tomcat)?, what if Vought or Boeing had built the F-16?, what if the Navy had bought a Navalised F-16 instead of the YF-17 (F/A-18)? see what an F-15 with wide spaced engines & blended wing-body would have looked like if LTV had won.

Endlessly fascinating!

By T. Test

I am very much a "What If" sort of airplane buff, so I love prototypes. (You should see the 48th scale Republic F-91 Thunderceptor kit I built with Air National Guard markings and nuclear-tipped Genie

missiles...). But this book goes FAR beyond prototypes into the world of the never-built.

It's fascinating to see, for example, the designs that the never got off the drawing board, beaten out by what would become the Century Series. Or to see what the competitors looked like in the competition that was won by the F-16. If you like this sort of thing, you won;t put this book down until you've read the whole thing in one day. Then you'll read it again...

I could write the exact same review about all of the other books in this series.

A very great find!

By Ariel Gonzalez Piñeiro

One of these rare books that give much more than expected. Really exhaustive and very well illustrated. Addictive. Brilliant. Thanks Tony Buttler!
