If you are a leader over 35, this book should be on your reading list.

By Timothy D. Balow

To echo what was said in my title, if you are a leader over the age of 35, LeadershipNext by Eddie Gibbs should be on your reading list for the sake of your development, and for the sanity of the potential leaders that are in their twenty-somethings. As a leader in my mid-twenties, I genuinely sense that I am misunderstood with many of my comments, values, and outlook whenever I dialogue with older leaders. When I say "older" leaders, I do mean anyone that is over the age of 35. That may sound like a crass threshold to establish, but the reality is, the continuous change of our culture means that the rate of information is forming (almost more than ever) the emerging generation.

Please, if you are a Christian leader or pastor that wants to understand leadership for the next generation NOW, then read this book. It has somewhat of a scholarly bent to it, but it is an enjoyable read and will deeply challenge your thinking and the potential "unlearnings" that you may need to embark on moving into the 21st century.

Next Possibilities

By Andrew

Eddie Gibbs continues to be authentic after writing *Church Next*. Chapter one sets the pace for redefining what leadership is. He consistently compares the secular and church images concluding that they are the same, at least from first impressions. A further comparison that carries a strong theme in most chapters is the defining of words. The secular image of 'charismatic' is an over bloated ego but in the world of church is a gifted leader in the Holy Spirit. Another consistent method used throughout the book is comparing leaders of yesterday with today. It appears that the risk takers of yesterday have become the conservative non-risk takers of today - hence the title *Leadership Next*.

He continues in chapter two provoking the reader that leadership styles must change. Gibbs covers three areas that are 'signs' to the 'times' we live in. From economic developments, demographic changes and the age of information he concludes that these are major reasons for styles of leadership to change. All three areas affect every culture therefore become relevant to his thought. There is a slight assumption that everyone is, or will be at some point, thinking like a postmodern. I found this a little ambiguous. There are some cultures that exist on tradition and repetition rather than forward thinking thought. Gibbs does not give this much attention in his book. If anything, he assumed that all under thirty-five's are shaped by postmodernism. Although this may be true for white America it cannot be true for Latino, Asian, African American or Native American cultures.

Following chapters tackle the difficult issues of network and hierarchies leadership styles and traits. He does draw up excellent characteristics of a Christian leader than can be transposed into any culture. I felt this needed expounding a little more. What became apparent as I read further into the book was his passion to recover missional leadership in missional churches. He addresses the 'transaction' leadership of keeping the organization in check and running rather than a fluid movement in keeping with original biblical practice.

His emphasis on connecting in teams and empowering the individual to operate within a team but keep their authenticity is an excellent thought, but tough to practice. Coupled with this is an excellent chapter on facing the cost of leadership. This particularly caught my attention within my own ministry context. Surviving criticism should be a compulsory class for every emerging leader for the missional church! Gibbs correctly states that a leader cannot escape criticism. Enduring loneliness is a subject many authors do not address that Gibbs has fully embraced. His biblical examples of King David paint a clear picture of a leader who will accomplish an assignment from God with personal cost. His conclusion is an inviting one of leaving a legacy using Jesus as the ultimate model that has survived and thrived for over two thousand years. He correctly states that there is a difference between success and fruitfulness. Leaving a legacy for the next generation of leaders is certainly a fruitful ideal.

Recommended!

By UpDownAllAround

Seriously wonderful book about leadership. Written from a Christian perspective for Christian leaders, but with wonderful information even for secular leaders. Highly recommended.

I had to read this for a seminary course and was not looking forward to it. Lots of little nuggets of biblical wisdom and proverbial truth. Beyond merely being about leadership this book helped me with a greater understanding of the Holy Trinity and the concept of koinonia (more than fellowship - fellowship in the gospel). Great read. Highly recommended.
