Need to know topics addressed.

By Christen V Bolotov

Too few schools address the ethics and business management practices of private veterinary medicine. I was lucky to have a crash 6wk course just before clinical year started and this was a book recommended to read. Lo, I find this book again and again, in libraries throughout the hospital services, with different parts looked through and highlighted... as if our clinical doctors page through it when they can and highlight the things that stand out...

Get your markers ready, some profound statements are made, and while this isn't a cover to cover, begging for more kinda book, it makes you think and definitely cements or knocks down long held convictions.

For me, this book spells out some things that I felt, but was unable to articulate.
